

Streaming Services

On Demand Audio and Video Streaming Services and Webcasting. VITIL IT offers support in AACplus, Shoutcast, Flash, Windows Media, Real Media Icecast and Quicktime formats.

Suggested Applications:

- On-demand streaming
- Multimedia delivery
- Multimedia archives
- Band and music web sites
- Content delivery & "Heavy Media"
- Corporate addresses/meetings
- mpeg downloads
- Podcast support

On-Demand content streams at request and can be repeatedly accessed.

Users have control of the content and are able to fast forward and rewind as needed.

Easy creation of Podcasts using the StreamGuide.

We deliver the content to end users acting as the Internet "broadcast tower" eliminating bandwidth consumption and operating costs on your local network.

On-Demand features include:

- FTP account for uploading your content
- Scalable Storage account
- Scalable Streaming server Channel

VITIL IT Network utilizes premium bandwidth and data centers to ensure global distribution and mission critical delivery.

Initial Setup

No prior streaming experience is necessary. VITIL IT provides all the support required to ensure a successful start from presales to setup.

We will give you the link to access your stream through the streaming server for placement on any web site.

Support

VITIL IT's expert technical and customer support staff offers complete one-on-one technical support. All accounts come with basic set-up and one month of free tech support.
